1 Introduction

Unaudited Quarterly Regulatory Disclosure Statement

These Unaudited Regulatory Disclosure Statement should be read in conjunction with the 2023 Condensed Interim Financial Statements (“financial statements”). The financial statements and this Regulatory Disclosure Statement taken together comply with the Banking (Disclosure) Rules under section 60A of the Hong Kong Banking Ordinance.

These banking disclosures are governed by the Bank’s disclosure policy, which has been approved by the Board of Directors. The disclosure policy sets out the approach to determine the content, appropriateness and frequency of the disclosures, the approach to ensure the relevance and adequacy of the disclosures, and the internal control over the process for making the disclosures. The disclosures have been subject to independent review in accordance with the disclosure policy.

Prior period disclosures as required by the Banking (Disclosure) Rules are available on our website: www.livibank.com.

Basis of preparation and consolidation

The capital ratios were calculated in accordance with the Banking (Capital) Rules (“BCR”) of the Hong Kong Banking Ordinance. In calculating the risk weighted amounts, the Bank adopted the Standardized (Credit Risk) Approach and the Standardized (Market Risk) Approach for credit risk and market risk respectively. For operational risk, the capital requirement is calculated using the Basic Indicator Approach.

At 30 June 2023, the Bank does not have any subsidiaries.

¹ Decrease in CET1% as of 30 June 2023 was mainly due to the increase in RWAs and operating loss for Q2 2023. Increase in Tier 1% and Total Capital % as of 30 June 2023 was due to the issuance of Additional Tier 1 in Q2 2023.

² Please refer to note 3b for the key drivers of total RWA changes.

³ Increase in leverage ratio was driven by the increase in Tier 1 capital base as a result of Additional Tier 1 issuance in Q2 2023.

⁴ Decrease in average LMR was mainly due to the increase in qualifiable liability in Q2.

The LMR disclosed above represents the arithmetic mean of the average value of the LMR for each calendar month within the quarter.

¹ Increase in credit risk for non-securitization exposures as of 30 June 2023 was mainly due to the increase in retail and small business loans portfolios.

² Decrease in market risk exposures was mainly due to less exposures in CNH denominated instruments.

³ Increase in operational risk exposure was due to more gross income than last quarter.

4 Composition of regulatory capital (continued)

a. Composition of regulatory capital (CC1) (continued)

(Notes) to the Template:

(on elements where a more conservative definition has been applied in the BCR relative to that set out in the Basel III capital standards.)

Description	At 30 June 2023	
	Hong Kong basis HK\$'000	Basel III basis HK\$'000
9 Other intangible assets (net of associated deferred tax liabilities)	227,323	227,323

Explanation

As set out in paragraph 87 of the Basel III text issued by the Basel Committee (December 2010), mortgage servicing rights (“MSRs”) may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to follow the accounting treatment of including MSRs as part of intangible assets reported in the AI’s financial statements and to deduct MSRs in full from CET1 capital. Therefore, the amount to be deducted as reported in row 9 may be greater than that required under Basel III. The amount reported under the column “Basel III basis” in this box represents the amount reported in row 9 (i.e. the amount reported under the “Hong Kong basis”) adjusted by reducing the amount of MSRs to be deducted to the extent not in excess of the 10% threshold set for MSRs and the aggregate 15% threshold set for MSRs, DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities or other credit exposures to connected companies) under Basel III.

10 Deferred tax assets (net of associated deferred tax liabilities)	–	–
--	---	---

Explanation

As set out in paragraphs 69 and 87 of the Basel III text issued by the Basel Committee (December 2010), DTAs of the bank to be realized are to be deducted, whereas DTAs which relate to temporary differences may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to deduct all DTAs in full, irrespective of their origin, from CET1 capital. Therefore, the amount to be deducted as reported in row 10 may be greater than that required under Basel III. The amount reported under the column “Basel III basis” in this box represents the amount reported in row 10 (i.e. the amount reported under the “Hong Kong basis”) adjusted by reducing the amount of DTAs to be deducted which relate to temporary differences to the extent not in excess of the 10% threshold set for DTAs arising from temporary differences and the aggregate 15% threshold set for MSRs, DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities or other credit exposures to connected companies) under Basel III.

Description	At 30 June 2023	
	Hong Kong basis HK\$'000	Basel III basis HK\$'000
18 Insignificant LAC investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	–	–

Explanation

For the purpose of determining the total amount of insignificant LAC investments in CET1 capital instruments issued by financial sector entities, an AI is required to aggregate any amount of loans, facilities or other credit exposures provided by it to any of its connected companies, where the connected company is a financial sector entity, as if such loans, facilities or other credit exposures were direct holdings, indirect holdings or synthetic holdings of the AI in the capital instruments of the financial sector entity, except where the AI demonstrates to the satisfaction of the MA that any such loan was made, any such facility was granted, or any such other credit exposure was incurred, in the ordinary course of the AI's business. Therefore, the amount to be deducted as reported in row 18 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 18 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.

19 Significant LAC investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	–	–
---	---	---

Explanation

For the purpose of determining the total amount of significant LAC investments in CET1 capital instruments issued by financial sector entities, an AI is required to aggregate any amount of loans, facilities or other credit exposures provided by it to any of its connected companies, where the connected company is a financial sector entity, as if such loans, facilities or other credit exposures were direct holdings, indirect holdings or synthetic holdings of the AI in the capital instruments of the financial sector entity, except where the AI demonstrates to the satisfaction of the MA that any such loan was made, any such facility was granted, or any such other credit exposure was incurred, in the ordinary course of the AI's business. Therefore, the amount to be deducted as reported in row 19 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 19 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.

	Hong Kong basis HK\$'000	Basel III basis HK\$'000
39 Insignificant LAC investments in AT1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	–	–

Explanation

The effect of treating loans, facilities or other credit exposures to connected companies which are financial sector entities as CET1 capital instruments for the purpose of considering deductions to be made in calculating the capital base (see (note re row 18) to the template above) will mean the headroom within the threshold available for the exemption from capital deduction of other insignificant LAC investments in AT1 capital instruments may be smaller. Therefore, the amount to be deducted as reported in row 39 may be greater than that required under Basel III. The amount reported under the column “Basel III basis” in this box represents the amount reported in row 39 (i.e. the amount reported under the “Hong Kong basis”) adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI’s connected companies which were subject to deduction under the Hong Kong approach.

Explanation

The effect of treating loans, facilities or other credit exposures to connected companies which are financial sector entities as CET1 capital instruments for the purpose of considering deductions to be made in calculating the capital base (see (note re row 18) to the template above) will mean the headroom within the threshold available for the exemption from capital deduction of other insignificant LAC investments in Tier 2 capital instruments and non-capital LAC liabilities may be smaller. Therefore, the amount to be deducted as reported in row 54 may be greater than that required under Basel III. The amount reported under the column “Basel III basis” in this box represents the amount reported in row 54 (i.e. the amount reported under the “Hong Kong basis”) adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI’s connected companies which were subject to deduction under the Hong Kong approach.

Remarks:

The amount of the 10% threshold mentioned above is calculated based on the amount of CET1 capital determined in accordance with the deduction methods set out in BCR Schedule 4F. The 15% threshold is referring to paragraph 88 of the Basel III text issued by the Basel Committee (December 2010) and has no effect to the Hong Kong regime.

Geographical distribution of credit exposures used in countercyclical capital buffer (CCyB1)

The following table sets out an overview of the geographical distribution of private sector credit exposures relevant for the calculation of the Bank's CCyB ratio.

At 30 June 2023

	(a)	(c)	(d)	(e)
Jurisdiction (J)	Applicable JCCyB ratio in effect	Total RWA used in computation of CCyB ratio of AI	CCyB ratio of AI	CCyB amount of AI HK\$'000

3 United States	0%	5,203		
4 Sum ¹		1,869,213		
5 Total²		1,869,213	1.00%	18,622

¹ This represents the sum of RWAs for the private sector credit exposures in jurisdictions with a non-zero countercyclical buffer rate.

² The total RWAs used in the computation of the CCyB ratio in row (3) represents the total RWAs for the private sector credit exposures in all jurisdictions to which the bank is exposed, including jurisdictions with no countercyclical buffer rate or with a countercyclical buffer rate set at zero.

6 Leverage ratio

a. Summary comparison of accounting assets against leverage ratio exposure measure (LR1)

The following table reconciles the total assets in the published financial statements to the LR exposure measure.

At 30 June 2023	(a) Value under the LR framework HK\$'000
1 Total assets as per published financial statements	3,934,782
2 Adjustment for investments in banking, financial, insurance or commercial entities that are for accounting purposes but outside the scope of regulatory consolidation	–
3 Adjustment for fiduciary assets recognised on the balance sheet pursuant to the applicable accounting standard but excluded from the LR exposure measure	–
4 Adjustments for derivative contracts	–
5 Adjustment for SFTs (i.e. repos and similar secured lending)	–
6 Adjustment for off-balance sheet (“OBS”) items (i.e. conversion to credit equivalent amounts of OBS exposures)	270,833
6a Adjustment for specific and collective provisions that are allowed to be excluded from exposure measure	(20,121)
7 Other adjustments	(207,202)
8 Leverage ratio exposure measure	3,978,292

Other adjustments mainly represent the intangible assets deducted in determining Tier 1 capital. These are excluded for deriving the leverage ratio exposure in accordance with the ‘Leverage Ratio Framework’ issued by the HKMA.

2	Less: Asset amounts deducted in determining Basel III Tier 1 capital	(207,202)	(218,684)
3	Total on-balance sheet exposures (excluding derivative and SFTs)¹	3,727,580	3,614,979
Exposures arising from derivative contracts			
4	Replacement cost associated with all derivative contracts (where applicable net of eligible cash variation margin and/or with bilateral netting)	–	–
5	Add-on amounts for PFE associated with all derivative contracts	–	–
6	Gross-up for derivatives collateral provided where deducted from the balance sheet assets pursuant to the applicable accounting framework	–	–
7	Less: Deductions of receivables assets for cash variation margin provided under derivative contracts	–	–
8	Less: Exempted CCP leg of client-cleared trade exposures	–	–
9	Adjusted effective notional amount of written credit derivative	–	–
10	Less: Adjusted effective notional offsets and add-on deductions for written credit derivative	–	–
11	Total exposures arising from derivative contracts	–	–
Exposures arising from SFTs			
12	Gross SFT assets (with no recognition of netting), after adjusting for sale accounting transactions	–	–
13	Less: Netted amounts of cash payables and cash receivables of gross SFT assets	–	–
14	CCR exposure for SFT assets	–	–
15	Agent transaction exposures	–	–
16	Total exposures arising from SFTs	–	–
Other off-balance sheet exposures			
17	Off-balance sheet exposure at gross notional amount ²	2,708,331	2,241,161
18	Less: Adjustments for conversion to credit equivalent amounts	(2,437,498)	(2,017,045)
19	Off-balance sheet items	270,833	224,116
Capital and total exposures			
20	Tier 1 capital³	1,039,569	378,816
20a	Total exposures before adjustments for specific and collective provisions	3,998,413	3,839,095
20b	Adjustments for specific and collective provisions	(20,121)	(17,507)
21	Total exposures after adjustments for specific and collective provisions	3,978,292	3,821,588
Leverage ratio			
22	Leverage ratio	26.1%	9.9%

¹ Increase in on-balance sheet exposures (excluding derivative and SFTs) was mainly due to the issuance of AT1 loan; partially offset by decrease in customer deposits and operating loss for Q2 2023.

² Increase in off-balance sheet exposure at gross notional amount was mainly due to the increase in retail loan exposures.

³ Increase in Tier 1 capital was mainly due to the issuance of AT1 loan; partially offset by the operating loss incurred during the reporting period.

b. Changes in defaulted loans and debt securities (CR2)

The following table sets out information on the changes in defaulted loans and debt securities, including any changes in the amount of defaulted exposures, movements between non-defaulted and defaulted exposures, and reductions in the defaulted exposures due to write-offs.

	(a) HK\$'000
1 Defaulted loans and debt securities at end of the previous reporting period (31 December 2022)	5,762
2 Loans and debt securities that have defaulted since the last reporting period	14,315
3 Returned to non-defaulted status	(223)
4 Amounts written off	(10,067)
5 Other changes	(1,075)
6 Defaulted loans and debt securities at end of the current reporting period (30 June 2023)	8,712

The defaulted loans increased during the first half of 2023 mainly due to the growth of retail loans exposures since the second half of 2022.

10 International claims

International claims are on-balance sheet exposures of counterparties based on the location of those counterparties after taking into account the transfer of risk.

Recognized risk transfer refers to the reduction of exposure to a particular country by an effective transfer of credit risk to a different country. For a claim on the branch of a bank or other financial institution, the risk will be transferred to the country where its head office is situated.
